

CITY FIX 2

PRODUCT DESCRIPTION

This material allows you to make all the thicknesses and lining from the brick surface directly this was made with the methods of global construction and it is perfect with the nature of construction in Egypt and Middle East.

Applications and advantages:

- ✓ It doesn't shrinking.
- ✓ Do not need to spray and the used directly on different surfaces with strong adhesion and it contains the materials which gives high strength and adhesion to all surfaces, which saves time and cost.
- ✓ Ease of work where it is lighter in weight with easier and faster in handling.
- ✓ Easy storage and easy control.
- ✓ Losses: Doesn't result in any loss due to the good physical properties of the strength of the mortar, which results in the consumption and cleanliness of the place.
- ✓ Surface: Used for internal and external surfaces and gives a very hard white surface.
- ✓ One component only to water only.
- ✓ Make different thicknesses and reach to more than 25 cm as a rate of 5.00 cm each hour.
- ✓ Used in the decorations work

Coverage:

- ✓ The bag 25 kg is to make 1.8-2 square meter thickness of 2 cm.
- ✓ The average density of the mixture is 1300-1400 kg / m³
- ✓ The maximum thickness is 50 mm.

Safety and Environment Guidelines:

Do not leave the remaining material in the water or soil streams and should be disposed of in accordance with environmental regulations.

Storage:

Store in a dry place and away from water and moisture.

Package:

plastic bag 25 kg

Al-Obour Buildings - Salah Salem Road - Nasr City - Cairo - Egypt.
10th Of Ramadan City.
